MARCIN PARDA

Senior Frontend Developer with Python

📞 +48 576 259 548   ✉ marcin98parda@gmail.com   in linkedin.com/in/marcinparda   📍 Warsaw, Poland

SUMMARY

Specialist with over 5 years of experience, including over 1.5 years as a senior developer. Acting as a code mentor and technical recruiter. Regular frontend and seasoned speaker at IT meetings and blogger. Active participant in events such as Advent of Code and hackathons. More about me: https://www.parda.me/work
(CV has more than one page, please scroll)

SKILLS

React • Typescript • Node.js • Nx • AI agents / MCP • Vitest / Cypress / Jest • Next.js • Vue / Astro / Angular • FastAPI • Python • Postgres • Redis • Docker • SQLAlchemy • express.js • English B2 • Polish Native

KEY ACHIEVEMENTS

◇ **Helped excels carrier of my mentees and mine**

I mentored several colleagues who consistently excelled and received promotions. My own achievements led to a rapid promotion from "early senior" to a higher position within a year.

◇ **Delivering with cut budget**

As sole developer, I reduced development time from six to four months. We delivered a minimalistic product, and the client returned with more budget for further work.

◇ **Awarded "SPOT award" bonus**

I led a side project automating CV updates, saving 0.5 hours monthly for each of over 100 employees.

◇ **Increased employment**

Successfully expanded my company's team presence at the client's site by delivering the project from initial client workshops through to a functional Minimum Viable Product (MVP), which led to the client hiring additional personnel from my company.

EXPERIENCE

Senior Developer   11/2023 - Present; Warsaw, Poland

EY GDS

Consulting company, BIG4
- Successfully led a team developing internal applications; handled requirements gathering with managers, authored user stories, assigned tasks, set priorities for architecture and complex feature development, and facilitated a smooth project handover to management.
- Spearheaded the migration from a broken microfrontend solution to a monorepo architecture for five projects, enabling easier code sharing, simplifying new project creation, and reducing deployment times from ~40min to ~10min.
- Orchestrated migration initiatives from legacy frameworks and infrastructure. Delivered React upgrade and a full UI overhaul across all pages, both delivered on schedule and resulting in zero major bugs or design inconsistencies.
- Created and maintained a detailed frontend developer competence matrix, accelerating the on-boarding and learning skills assessment for employees using a technical problem-solving skills.
- Coordinated knowledge-sharing meetings within the frontend & design department, fostering learning and best practices across teams by participating in industry events and community.
- Contributed to multiple proof-of-concept projects, including an AI RAG-based chatbot (web components + Flask) designed for easy

integration into other solutions.

- Built and maintained design component libraries using Storybook for two key projects, improving UI consistency, docs and reusability.
- Resolved a persistent login issue by forking and updating the MSAL library, ensuring stable authentication for end users.
- Gained valuable insights and work-ethics lessons about documentation, testing, code reviews, and sprint refinement through close collaboration with an experienced tech lead, leading to more accurate task estimation and flawless sprint goal delivery.

Javascript Developer
04/2022 - 11/2023; Olsztyn, Poland

STX Next (continuation of work at Ermlab Software)

AI Python software house
- Speeded up internal screens of internal applications from ~5s to less than 0.5s via refactor.
- Planned frontend architecture multiple times, selecting appropriate tools and libraries for new projects.
- Learned a Python extension development and created a MVP of an extension project before estimated time.
- Developed a mobile application for vets and patients.
- Implemented integration systems.
- Provided assistance and guidance to other Team members.
- Participated in additional activities such as AI hackathons (manage to won!), Tech Talks, and Meetups.

Frontend Developer
07/2020 - 03/2022; Olsztyn, Poland

Ermlab Software

AI Python software house
- Worked on developing and maintaining frontend projects in React and Angular technologies.
- Created complex multistep forms, web applications with facebook auth.
- Created data visualization for AI scientific research.
- Co-created Google Chrome extension.
- Technically supervising learning meetings and leading several of them.

EDUCATION

Bachelor of Science in Computer Science
University of Warmia and Mazury in Olsztyn
2017 - 2021

PERSONAL PROJECTS

Blog
03/2023 - Present

Live - https://www.parda.me/blog

Code - Blog

- Technical blog where I write about web development topics.
- Primarily cover front-end development, but I also cover topics related to working as a developer.
- Trying to keep them short but understandable, using real-life scenarios for better understanding.
- Trying to write posts monthly.

Cockpit
03/2023 - Present

Live - https://www.cockpit.parda.me

Code - Cockpit Backend & Cockpit Frontend

- Cockpit project consists of several apps that help boost my productivity and overall quality of life, such as managing my budget and assisting with newsletters.
- FastAPI backend for frontend applications. Using Postgres, SQLAlchemy, Pydantic.
- NX monorepo for my frontend applications. Using React, Angular, Vue, OpenAPI types generation, tailwindcss, vitest.
- Docker & Raspberry Pi Deployment

COURSES

- Microsoft Certified: Azure AI Fundamentals
- Microsoft Certified: Azure Fundamentals
- AI Devs 2 & 3 - AI integration and building agents
- Architecture on Frontend (Architektura na Froncie)
- FastAPI masterclass from scratch
- Modern Frontend - Next.js, React, GraphQL and Typescript
